

Unofficial Redmine Cooking - QA #812

apahce+passenger redmine

05/30/2018 05:59 PM - Tamura Shinji

Status: 	Start date: 05/30/2018
Priority: 	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Spent time: 0.00 hour

Description

http://blog.redmine.jp/articles/3_4/install/centos/

Redmine

passenger

```
LoadModule passenger_module /usr/local/lib/ruby/gems/2.4.0/gems/passenger-5.1.12/buildout/apache2/mod_passenger.so
```

apache config

```
<VirtualHost *:80>
    ServerName rd.xxxx.co.jp

    DocumentRoot "/var/www/rd"
    Alias /hoge /var/www/redmine/site/hoge/public
    <Location /hoge>
        PassengerBaseURI /hoge
        PassengerAppRoot /var/www/redmine/site/hoge
    </Location>
    <Directory "/var/www/redmine/site/hoge/public">
        Require all granted
    </Directory>
</VirtualHost>
```

passenger-status

apache

```
AH01276: Cannot serve directory /var/www/rd/: No matching DirectoryIndex (index.html,index.php,index.php) found, and server-generated directory index forbidden by Options directive
AH01276: Cannot serve directory /var/www/redmine/site/hoge/public/: No matching DirectoryIndex (index.html,index.php,index.php) found, and server-generated directory index forbidden by Options directive
```

passenger 5.1.12
